Dark souls 3 spear build pve guide full

9 Hexes Stats And Gear Starting Class Core Stats Intelligence: 30 Faith: 30 Weapon Crucifix of the Mad King Only if you're playing hybrid Catalyst Caitha's Chime Izalith Staff Spells Vow of Silence Great Soul Dregs Affinity Dark Blade Rings Sage Ring Ring of Favor Dark Clutch Ring Preference Hexes have seen a significant nerf in Dark Souls 3 compared to the second entry, distributing these unique spells throughout every school of magic instead of being a dedicated magic archetype. For this build, your two main stats are Dexterity and Faith. Utilize the power of lightning and Blessed weapons to smite your foes. 3 Pure Strength Stats And Gear Starting Class Core Stats Weapon Lothric Knight Greatsword Any Greatsword or Ultra Greatsword Rings Ring of Favor Chloranthy Ring Preference Preference If casting spells doesn't sound appealing, try out a pure Strength build. Sunlight Spear and Lightning Stake will shut down most enemies, while healing miracles will be comparable to an upgraded Estus Flask. To help you create a good PvE build, each build in this article had its stat and gear breakdown reorganized. The versatility on offer is some of the best you can find in Dark Souls 3. It's the reason why so many speedrunners and PvE players use this weapon over others. Focus on obtaining a Sharp Gem in the early game, then infuse the Sellsword Twinblades. Funny enough, it's also the easiest build to get going on this list. For the former, look out for the Crystal Sage's Staff and any Crystal spells; they're the best for this build. Killing him will grant the Uchigatana, a fantastic starting weapon that will carry you through the rest of a playthrough. Scale your Dexterity to 60 as soon as possible to get the most out of your weapons. The Dark Souls series is infamous for how difficult it is, making even the most patient of players throw their controllers at the wall. Whichever route you take, you'll be one-shotting most enemies by the end of a Dark Souls 3 playthrough and subsequent NG+ playthroughs. With a 60 Faith stat and the Sunlight Talisman, you can output some powerful Lightning Spears and healing miracles. For this build, we'll be using Caitha's Chime for miracles and the Izalith Staff for sorceries—both of which scale with Faith and Intelligence evenly. Your chime and catalyst will determine which stat scales your Hex. If you can stand the slow playstyle, this is one of the best builds any player can use. If you care about min-maxing, the best weapon for a quality build is the Hollowslayer Greatsword, a boss weapon obtained after killing the Curse-Rotted Greatwood—one of the first bosses you'll face. 7 Dexterity Build Stats And Gear Starting Class Core Stats Weapon Uchigatana Sellsword Twinblades Onikiri and Ubadachi Rings Ring of Favor Chloranthy Ring Preference Preference Dexterity might not be as powerful in Dark Souls 3 as in previous installments, but you can absolutely make a Dexterity build work in DS3. 2 Pyromancer Stats And Gear Starting Class Core Stats Intelligence: 30 Faith: 30 Weapon Demon Scar Any Chaos-infused weapon Catalyst Spells Power Within Chaos Bed Vestiges Rapport Rings Sage Ring Fire Clutch Ring Preference Preference With a series focused on linking the fire, it's surprising how pyromancy took a backseat to sorceries and miracles. Attacking and dodging will chew through your Stamina bar if you aren't careful. If you don't like greatswords, feel free to use any weapon that scales somewhat well with either or both stats. Ultra greatswords like the Fume Ultra Greatsword allow you to wield weapons twice their size and deal ridiculous amounts of damage. Rings are entirely up to you, although you might want to consider the Ring of Favor and Chloranthy Ring to help with Stamina management. To help you create the strongest Ashen One possible, here are the ten best PvE builds in Dark Souls 3 that make the game significantly easier. It also has a great moveset with a healthy mix of hyperarmor (preventing you from getting stunned mid-animation) and swings. Just note that some enemies and bosses are completely immune to bleed, so be prepared for some boss fights to take ages. Alternatively, start as the Mercenary to get your hands on one of the best weapons in the game (detailed in our final build entry). You can either focus on a pure mage build, allocating most of your levels in Intelligence and Attunement, or you can run a hybrid build with Strength or Dexterity. Equip any rings that increase your Dexterity or Stamina. Use rings that enhance your Stamina pool; you're going to need it. Thankfully, Dark Souls 3 gives this school of magic a time to shine. Don't let that discourage you. 5 Paladin Stats And Gear Starting Class Core Stats Strength: 30 Faith: 30 Weapon Astora Greatsword Any Lightning-infused weapon Catalyst Spells Lightning Blade Sacred Oath Great Heal Sunlight Spear Rings Ring of Favor Sage Ring Lightning Clutch Ring Ring of the Sun's First Born Paladins focus heavily on Faith and Strength, casting lightning spells and healing cantrips in between melee attacks. Plenty of great damage pyromancies, such as Floating Chaos and Black Serpent, allow you to deal with nearly any situation. If you value utility but love melee combat, this build is for you. You can use any weapon you enjoy; just be sure to infuse it with a Refined Gem. Your miracles allow you to heal and cast lightning-based miracles, giving you a solution to every problem you'll face. Greatswords are a fantastic weapon of choice for this, with weapons like the Black Knight Sword and Lothric Knight Greatsword having good movesets and great scaling. With that in mind, Hexes are still fantastic for players who want plenty of utility with their build. From there, increase your Dexterity stat to 60. 8 Mage Stats And Gear Starting Class Pyromancer Sorcerer Core Stats Attunement: 24 Intelligence: 60 Weapon Moonlight Greatsword Catalysts Spells Homing Crystal Soulmass Soul Greatsword Crystal Soul Spear Rings Sage Ring. Magic Clutch Ring Preference Preference Pure mage characters take a long time to come "online"—capable of finishing the game comfortably. The soft cap for both stats is 30, although you'll still gain a sizable damage boost for raising both stats to 45. It's pretty good in PvP too. Due to Ashen Flasks and a dedicated mana resource being introduced in Dark Souls 3, you'll need to either scale your Attunement or sacrifice a few Estus Flasks for Ashen variants. Sharp Gems are also excellent for Dexterity builds, enhancing their Dexterity scaling. Once again, a Refined Gem will do wonders for this build. Updated August 12th, 2021, by Charles Burgar: Creating a build in Dark Souls 3 can be intimidating when starting out. They serve as a great gish or spellsword class in Dark Souls 3, allowing you to carve through enemies with a large sword while throwing an occasional lightning bolt or healing miracle. If you talk to Yoel of Londor at the Foot of the High Wall Bonfire, he will return to Firelink Shrine and allow you to gain a free level. In fact, some of the best weapons in Dark Souls 3 scale incredibly well with Dexterity, making Dexterity builds a solid choice for beginners that aren't sure what to play. Upgrade your Faith and Intelligence evenly, trying to hit at least 30 in each stat. Since it's a hybrid build, you'll want to be using rings that enhance your miracles and cast speed to prevent the build from feeling clunky. In practice, this means you can use virtually every weapon in the game. Luck is what scales your bleed damage for this build, so spec heavily into that stat and increase your Hollowing stat. It scales absurdly well with both Strength and Dexterity, reaching an Attack Rating of 516 when both stats are 40. Of course, the best thing to do is take a break, but some items present in Dark Souls 3 can ease the frustration. 1 Sellsword Twinblades Stats And Gear Starting Class Core Stats Gear Warden Twinblades Rings Hunter's Ring Ring of Favor Preference Preference There's a reason the community calls these pair of curved swords the "Sellsword Winblades." The damage this pair can dish out is nearly unmatched in Dark Souls 3's PvE content. Power Within and Flash Sweat are also some fantastic buffs if you want to create a hybrid build. Want to make an enemy instantly bleed? 10 Bleed and Hollow Stats And Gear (Pick One) Core Stats Weapon Warden Twinblades Rings Ring of Favor Prisoner's Chain Preference Preference Both Bleed and Hollow are included in the same entry because there is quite a bit of overlap between the two. Use Vow of Silence. Pick the Mercenary class, and you'll already start with these blades. Rapid attacking weapons usually come with this effect intrinsically, so most bleed builds spec for some Dexterity atop Luck to scale the damage of their initial hits and Bleedprocs. You'll be outputting as much damage as some greatswords twice as quickly. You can even use the Demon Scar to cast pyromancies while cutting through mobs with a burning curved sword. This build comes online towards the end of a playthrough, although its versatility and ease of use make it a great choice for PvP and NG+ playthroughs. With a game that requires so much patience, it can be beneficial to use a powerful build to make the game less frustrating. That's perfect for this build, as Hollowing increases the damage of Hollow-infused weapons. Once you reach Firelink Shrine, defeat the Sword Master that roams near the Firelink Shrine Tower. With 40 points in both Faith and Intelligence, pyromancy will deal significant damage and outclass most hexes. 6 Dex/Faith Hybrid Stats And Gear Starting Class Core Stats Weapon Dragonslayer Spear Any Blessed/Sharp-infused weapon Catalyst Spells Sacred Oath Great Heal Lightning Spear Rings Ring of Favor Sage Ring Lightning Clutch Ring Ring of the Sun's First Born This build is focused on using Dexterity weapons and miracles to turn the tide. They're now listed in tables at the start of the entry, making it much easier to parse. Besides summoning phantoms for co-op, your main way of improving your damage is to get better weapons, spells, or improve your stats. Using Dorhy's Gnawing. 4 Quality Build Stats And Gear Starting Class Core Stats Strength: 40 Dexterity: 40 Weapon Hollowslayer Greatsword Any Refined-infused weapon Rings Ring of Favor Prisoner's Chain Preference Preference If you're indecisive about what to play, it's hard to go wrong with a quality build. It's a very versatile school of magic that veteran players should try. When they do, mages can do nearly anything you would want. The Dragonslayer Swordspear is a good choice for this, as it scales off of both your Faith and Dexterity quite well. Allocate at least 60 points into strength and watch as you one-shot all but the toughest of mobs and bosses. We've also done a review of some of the builds on this list, noting alternate weapons or rings you might want to use. If you are playing a hybrid build, check out the Moonlight Greatsword. A large range of stats, items, and spells can make finding a build somewhat difficult. Versatility, damage, defense, this build has it all. Next: Dark Souls 3: Must Know Things For New Players Dark Souls 3: Every Ring And Where To Find Them Lists Guides Dark Souls Dark Souls 3 Charles Burgar (950 Articles Published) More From Charles Burgar Bleed is a status effect you can inflict on enemies and some bosses, dealing a percentage of damage to their health bar and staggering the target. This sword's damage scales off your Intelligence and can shoot projectiles with its heavy attack. In exchange, you gain a Dark Sigil, allowing you to become Hollow. For an earlier alternative, get any weapon you favor and infuse with a Blessed or Sharp Gem to get even more damage. Want to prevent a boss from using any special attacks? When done properly, you can stagger most bosses in the game and rapidly defeat tanky enemies. This is similar to our last entry, except this build focuses more on Strength instead of Dexterity. Quality builds are those that invest equally into Dexterity and Strength to scale a weapon's Attack Rating as high as possible.
